SILO Q1

料仓收尘机

Silo Venting Filters

料仓收尘机 SILO Q1

SILO Q1为多边形收尘机，用于气力输送料仓的通风口。采用碳钢筒体，椭圆形针刺毡滤袋垂直安装，喷气清洁系统和铰链固定防雨盖连成一体。

通过滤袋分离的粉尘，被反向脉冲清洁压力空气从滤袋表面清除，落回到料仓中。

SILO Q1因其标准化设计，应用于某些特定场合，如混凝土搅拌站，保持了简单高效优势。

SILO Q1 is a polygonally shaped dust collector for venting pneumatically filled silos. The painted carbon steel casing contains vertically mounted, felt pocket-type filtering elements. An air jet cleaning system is integrated in the hinged weather protection cover.

Dust separated from the air flow by the felt media drops back into the silo after an integrated automatic reverse air jet cleaning system inside the weather protection cover has removed it from the filter elements.

SILO Q1 is designed for defined standard applications, such as concrete batching plants, offering the combined advantage of high efficiency and easy maintenance.
